PROFILE SUMMARY

MERN Stack Developer with experience in building web applications using **MongoDB**, **Express.js**, **React.js** and **Node.js**. Proficient in developing scalable solutions and collaborating in team-based projects. Focused on writing clean, efficient code and continuously improving technical skills.

SKILLS

Programming Languages : JavaScript | TypeScript | C | Dart | HTML
Front-End Development : React.js | Redux | Flutter | HTML | CSS
Back-End Development : Node.js | Express.js | JWT |
Databases : MongoDB | PostgreSQL | Firebase | PG Admin | DBeaver
Integrations & APIs : Razorpay | SMTP | Passport.js | Google API | Swagger | NodeMailer
Deployment & Cloud : NGINX | AWS EC2 | Vercel | DigitalOcean | Render (OnRender) | Docker
Tools & Utilities : Git | GitHub | Postman | VS Code | Figma | JetBrains IDEs | Cursor AI | Google Anti-Gravity IDE

PROFESSIONAL EXPERIENCE

Datamate Info Solutions Ltd - Kochi, Kerala

Mar 2025 – Sept 2025

Junior Software Consultant – R &D (AI)

- Developed ERP software modules, including an Accounting Package, with modern UI components to ensure a user-friendly and seamless user experience.
- Collaborated closely with the R &D team to design interfaces, build business logic, perform technical research, solve problems, and develop internal productivity tools.
- Utilised Swagger for API documentation, testing, and smooth backend integration; managed SQL tables using pgAdmin, performed CRUD operations, and followed Clean Architecture principles for maintainable code.

Trainee Software Engineer

- Worked in Agile sprints using Jira, ensuring timely task completion, and used JetBrains IDE for efficient development, debugging, and code reviews.

MAIN PROJECTS

Hidden-Aura

[Git](#) | [Live](#)

E-Commerce Platform (Full-Stack / Live-Testing Phase)

Node.js, postgresql

- Premium Product Marketplace** Built a modern e-commerce platform for authentic Kerala food, spices, and premium products.
- Secure Authentication** Developed modules for product CRUD, category management, orders, email notifications, and user controls.
- Admin Dashboard** Developed modules for product CRUD, category management, orders, email notifications, and user controls.
- User Features** Added cart, wishlist, ordering system, address handling, and smooth checkout with Cash on Delivery.
- Role-Based Access** Created separate access for Admin, Users, and Vendors to manage products and view orders.
- Deployment** Containerized the entire application with Docker and deployed a live testing environment.
- Scalable Architecture** using Express controllers, services, middleware, and PostgreSQL schemas optimised for future features like online payments and vendor-specific analytics.

Flourish

[Git](#) | [Live](#)

Scalable E-commerce Platform

Express.js, MongoDB

- **Tech Stack** :Node.js, Express.js, MongoDB, HTML5, CSS, Bootstrap, JavaScript, jQuery, Razorpay, Passport.js, NodeMailer, NGINX, AWS.
- **User Features** :Built a secure e-commerce platform with profile, cart, wishlist, order tracking, and multi-payment options (Razorpay, wallet, COD).
- **Admin Dashboard** :Developed a powerful dashboard for managing users, products, categories, orders, offers, coupons, and analytics.
- **Product & Category Management** :Simplified product, image, and category handling with scalable offer configurations.
- **Offers & Coupons** : Built a dedicated offer system with product, category, and referral-based discounts.
- **Wallet & Payments** : Integrated wallet and Razorpay for secure, flexible payments.
- **Ratings & Reviews** : Added user review and rating features to boost engagement and trust.
- **UI/UX** : Crafted a responsive, user-friendly interface using HTML5, CSS, Bootstrap, and jQuery.

MINI PROJECTS

OLX

[Git](#)

Virtual Marketplace

React, Firebase

- **Firestore Integration:** Implemented Firebase Authentication for secure user management and Firestore as a NoSQL database for product listings, utilizing Cloud Functions for automated notifications.
- **Dynamic UI:** Built a dynamic UI with React Hooks, using useEffect for data fetching and useContext for global state management, enhancing performance for real-time product browsing.

Netflix

[Git](#)

OTT Streaming Platform

React, Firebase

- **Dynamic API Integration:** Utilized the TMDB API for real-time data on newly released movies, implementing asynchronous data fetching with Axios for efficient API call management and responses.
- **Optimized Component Architecture:** Integrated the YouTube API for HD trailer playback using embedded players, while implementing a component-based architecture in React to boost performance through memoization and lazy loading techniques.

User Management System

[Git](#)

User Management System — MERN Stack

React, Express.js, MongoDB

- Created a complete **User Management System** using **MongoDB, Express.js, React.js, and Node.js**, enabling full CRUD operations with efficient data handling and responsive UI.

Admin Panel

[Git](#)

Admin Panel (CRUD Operations) — TypeScript

TypeScript, Express.js, MongoDB

- Engineered a robust **Admin Panel** featuring full CRUD functionalities, developed using **HTML, CSS** for the frontend and **Node.js, Express.js, TypeScript, and MongoDB** for a scalable and type-safe backend.

EDUCATION

Brototype

2024 – 2025

Full Stack Development

Bangalore, India

Govt: Polytechnic College

2019 – 2022

Diploma in Electrical and Electronics Engineering

Kannur, India

SELF DECLARATION

I hereby declare that the above information is true and correct to the best of my knowledge.
